

YORKSHIRE PRECISION ENGINEERING LIMITED

QUALITY POLICY STATEMENT

Yorkshire Precision Engineering limited commands a wealth of experience in production and supply of precision components to clients and customers in a wide range of commercial activities.

Supply of precision components covers a wide spectrum of applications and the company boasts several 'blue-chip' customers as 'partners'. This customer base contains clients from varied industry sectors including automotive, aerospace, marine, medical and surgical and the brewing industry

Yorkshire Precision Engineering, based in the North of England, serves customers in the whole of the United Kingdom – and beyond.

The Company is justifiably proud of its component production and associated services and intends to retain its reputation as one of the best of the major competitors involved in precision turned parts.

We realise that this can only be achieved by ensuring that all components and associated services are second to none and are 'simply the best'.

As a result, Yorkshire Precision Engineering is fully committed to continual improvement and ensuring the highest standards for all customers.

The Company sets clear objectives and business goals, which are reviewed by Company Directors and Management on a regular basis to ensure progress and improvement.

In order to meet these objectives and to publicly state this commitment, we have implemented a quality system meeting all the requirements of ISO 9001: 2015

This policy is understood by all at Yorkshire Precision Engineering, each individual understanding his/her role in the provision of quality components and services.

The policy is implemented by the use of process focused procedures which are monitored on a regular basis by internal management and which are reviewed annually by a UKAS accredited assessment authority.

Yorkshire Precision Engineering intends the use of the quality system as the forum for the company's development well into the future.

Signed:

Managing Director
Samuel Laybourne
